

CONGRATULATIONS . . .

Because someone cares enough about you to share this important information.

Over half the American population is not receiving adequate dental care. They risk developing serious tooth, gum, and other related dental problems. In addition, we now know dental disease can contribute to heart problems, stroke, diabetes, low birth weight babies and other health concerns. In other words, "If your mouth isn't healthy - you aren't healthy!"

Our Mission is to prevent and eliminate dental disease. This is why our office has created a "Care Enough To Share Campaign."

Everybody Wins! Please Read on . . .
